

Remove the “-” there

Dashboard

Manage your property listings — add, edit, or delete

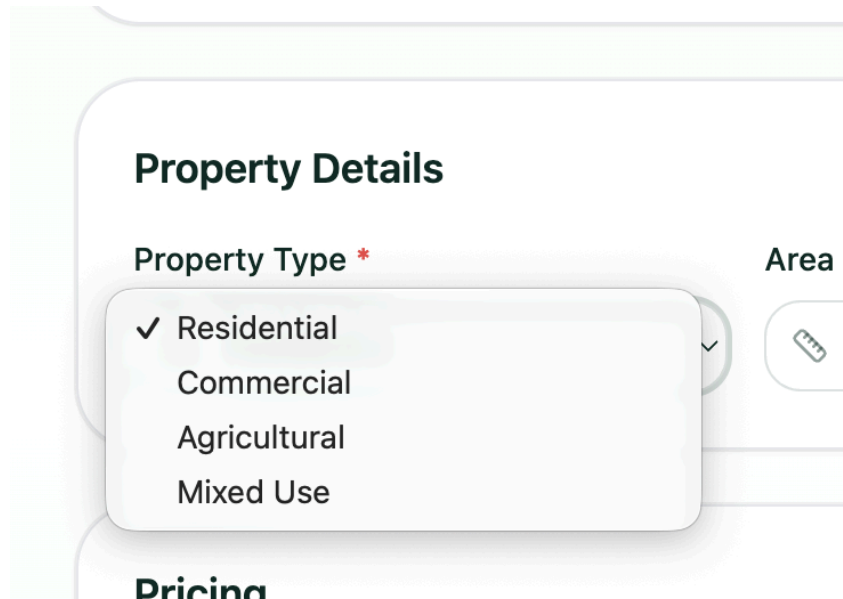

we should not have rent on the investor side when they are uploading or listing house cause we are not renting

We should have property type which should be land or house cause those are the two we are selling .. so that people can come on an can select what they want

Change property type to property user purpose..

Property Details

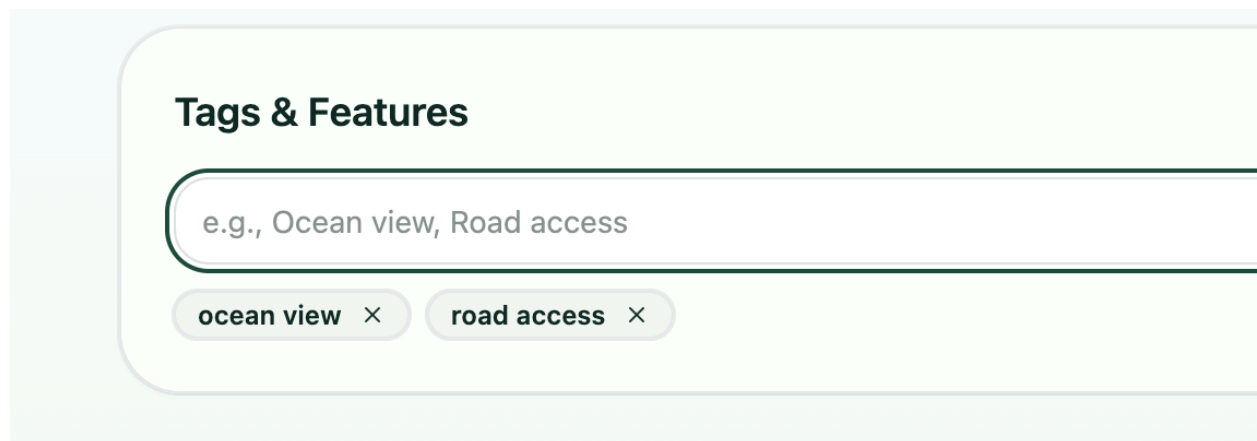

Property Type * Area (

- ✓ Residential
- Commercial
- Agricultural
- Mixed Use

Pricing

The image shows a form titled 'Property Details'. It has a dropdown menu for 'Property Type' with a red asterisk indicating it is required. The dropdown is open, showing four options: 'Residential' (selected with a checkmark), 'Commercial', 'Agricultural', and 'Mixed Use'. To the right of the dropdown is a label 'Area (' followed by a small icon of a ruler. Below the dropdown is a label 'Pricing'.

How are we gonna use this tag and features ...

Tags & Features

e.g., Ocean view, Road access

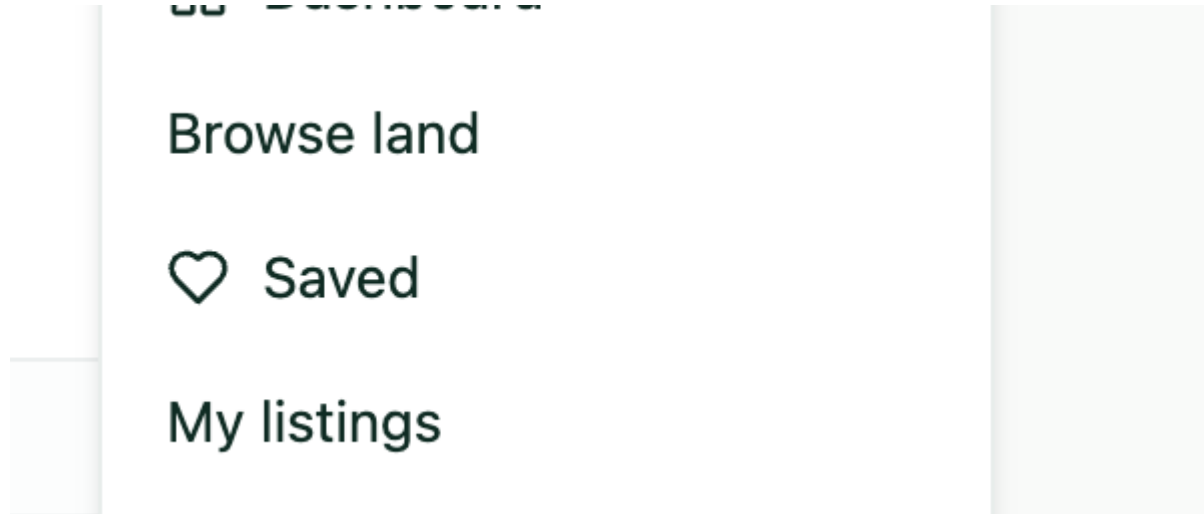

ocean view × road access ×

The image shows a form titled 'Tags & Features'. It has a text input field with the placeholder text 'e.g., Ocean view, Road access'. Below the input field are two tag chips: 'ocean view' and 'road access', each with a close button (×).

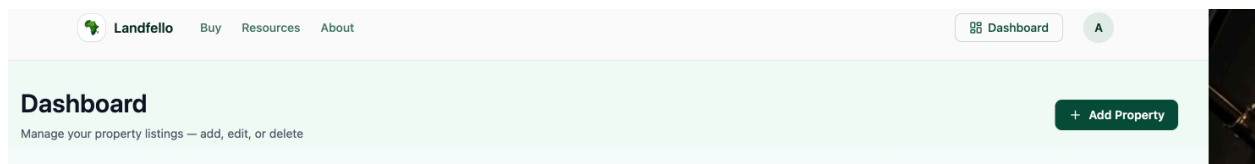

An agent or investor should not see (

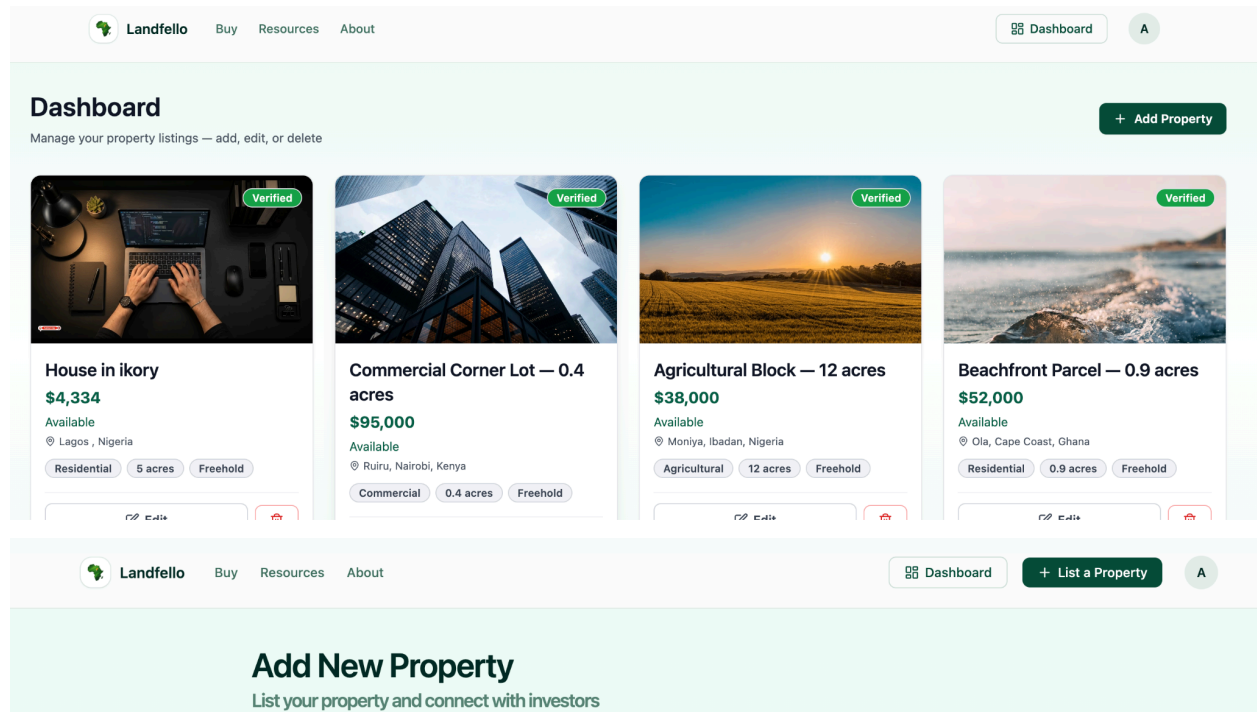

Buy, Resources, About) ... all they should see should be "Dashash board " which in this case is their dashboard

Remove Browse land,saved and my listing away form the agent place cause we do not need those

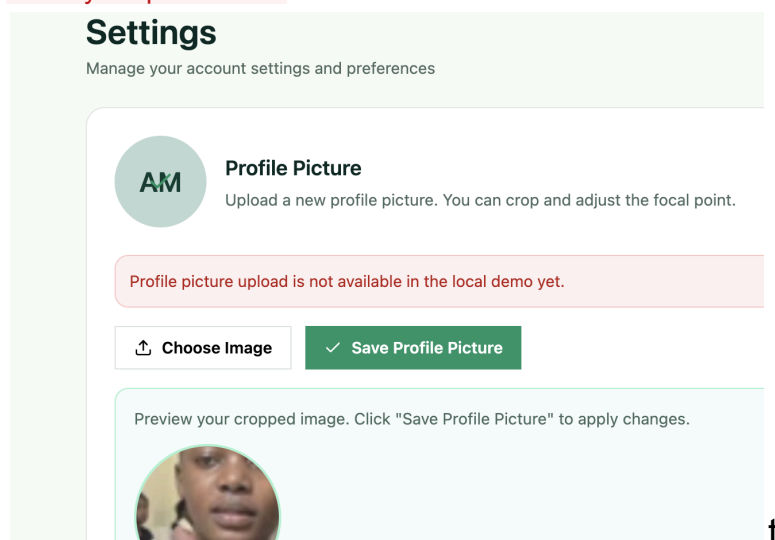

I see that the top tab on dash board and my listing is not the same and the button place ment is different .. please univfy the top bar and make it same.. I prefer you stick to the one that shows when we are on “add-property”

When updating profile pics I got this “Profile picture upload is not available in the local demo yet.” please fix it

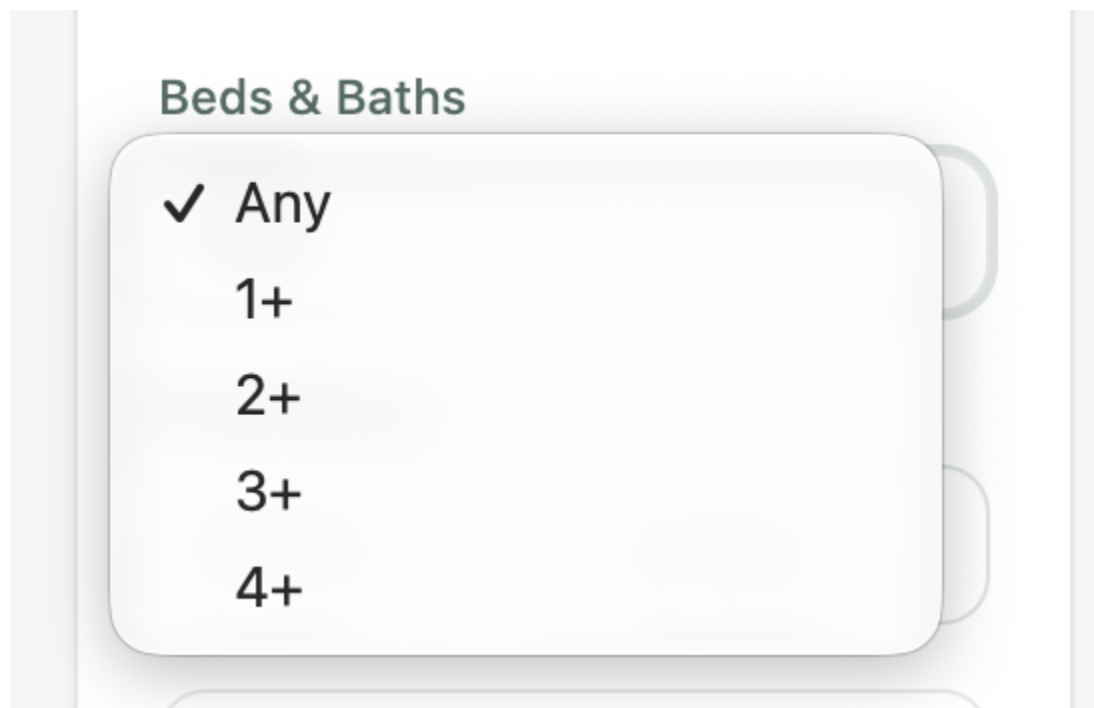

REmove faq for now

Remove about for now

We need a login and dashboard for the agent side ..

If the person selected property type to be house (when listing) then he needs to enter the beds and baths size and they need to be two separate things .. also on the user end we want to see that details and even in the filter part of things

That bed and baths should be two separate fields

Remove sell or rent across all cause we are not renting we are just selling

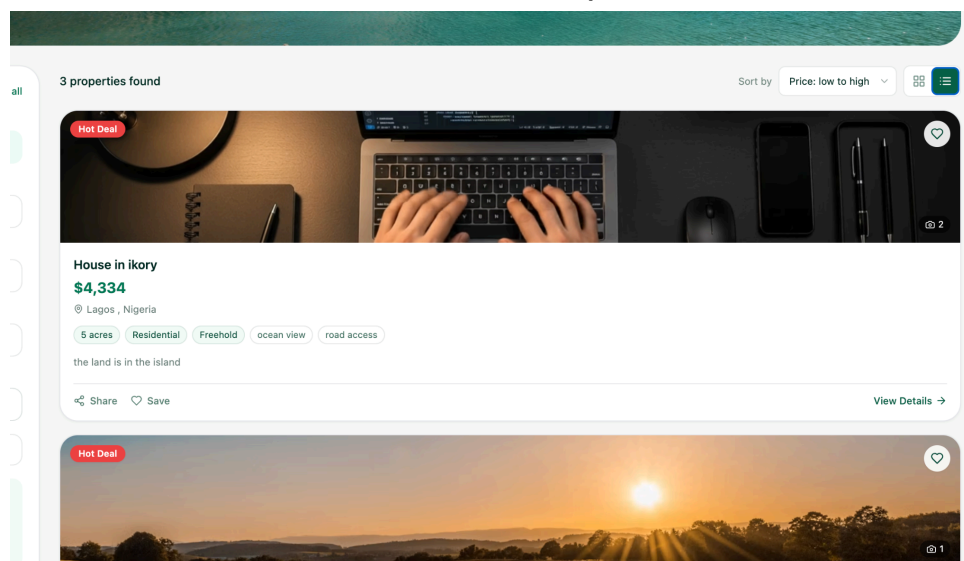

For Sale / Rent

For Sale

For Rent

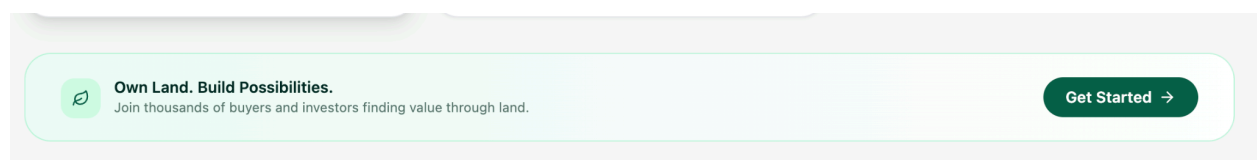

Any

On list view the UI looks so bad so please make it better

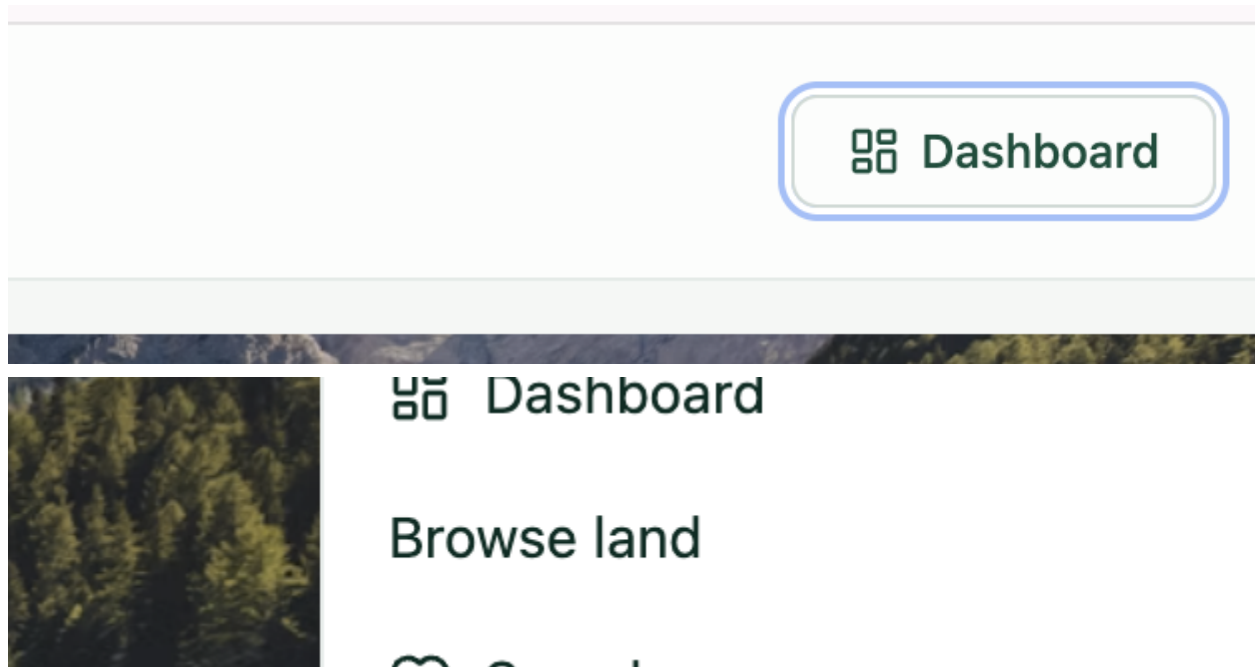

Remove ..Buy, Resources, About from the user end too

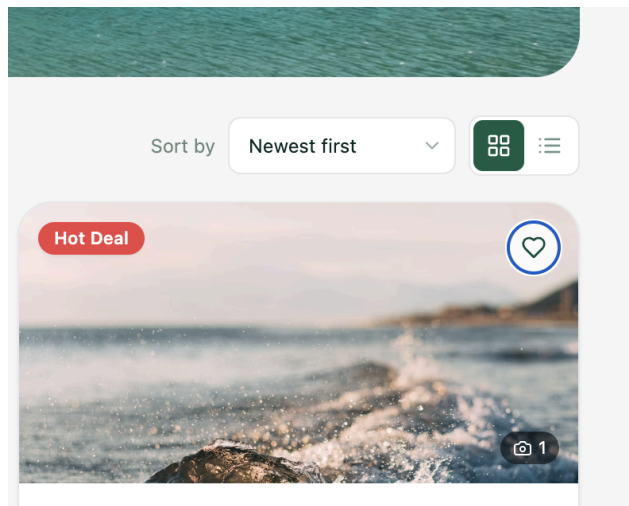

This should be changed to .. own a property and want to list it ?

Remove the Browsland part from the userend and in place of this Dashboard change it to “sell” so that when clicked it will take them to go and create investor / agent account

If a user tries to Save without being signed in then they should be taken to sign in

Change Get started to “sell”
